The CLI Global Society’s mission is to improve quality of life by preventing amputations and death due to critical limb ischemia.

#CLIFighters
The Critical Limb Ischemia (CLI) Global Society was formed by passionate leaders to address the unmet need of CLI. It was incorporated on January 11, 2016 and received 501(c)(6) status on June 20, 2016.

The CLI Global Society is the only organization that is solely dedicated to patients and the public health aspect of CLI.

The intent of the Society is to work toward a coalition of multiple organizations that share an interest in CLI to facilitate implementation of goals that would lead to ideal management of this impactful problem. The best way to improve awareness and enhance the way CLI is treated is through a coalition of like-minded organizations that can address clinical, coding, and reimbursement points of view. The Society will also work with like-minded organizations around the world to globally improve treatment and outcomes in patients with CLI.

CMS STRATEGY

The CLI Global Society has done expansive work leading up to this publication and recognizes the many challenges that CLI places upon patients, healthcare providers, and payers. In an effort to address these challenges, the Society is working on strategies to engage the government payer system to enact reform to improve care of patients suffering from this devastating disease.

<table>
<thead>
<tr>
<th>Issue</th>
<th>Strategy</th>
</tr>
</thead>
<tbody>
<tr>
<td>CLI is not sufficiently recognized as the growing public health concern that it is.</td>
<td>Improve clinical outcomes and economic impact of CLI for Medicare beneficiaries via policy and payment strategies.</td>
</tr>
<tr>
<td>No diagnosis codes exists for CLI</td>
<td>Create a definitive set of diagnosis codes that define CLI in acceptable granularity (by stage, disease severity, etc.) already recognized in clinical practice.</td>
</tr>
<tr>
<td>Costs for the treatment of CLI are among the greatest health care expenditure challenges today.</td>
<td>Develop consensus on critical costs for tracking and analysis purposes to inform potential care improvement/economic value propositions of new care models.</td>
</tr>
<tr>
<td>Amputation often remains a first line treatment and results in major disability, loss of work productivity and burdens to family and colleagues.</td>
<td>Develop cost models that include disability, loss of work productivity, caregiver costs, etc., to highlight the magnitude and impact of CLI as a vehicle for awareness and change.</td>
</tr>
</tbody>
</table>

The Society is working to tactically implement strategies by seeking CMS’ proactive engagement to define, identify CLI clinical consequences, patient outcomes and economic impact. The Society has intent to pursue ICD-10 codes within the prescribed CMS/NCHS process. Engagement with CMS will be sought to evaluate possible payment models to align payment with CLI care that follows best clinical practices. Leveraging existing research and publications and the engagement of health economists, data analytic experts, employer, and actuarial health data analytics experts is essential to model non-CMS-related costs of CLI.

CURRENT SOCIETY ACTIVITIES

Membership has grown significantly with a firm benchmark in place to reach 500 members by the end of 2018. Global presence continues to excel with member representation in 21 countries:

An active advisory board has begun the process of creating alliances to achieve goals. The Society has been actively involved in supporting educational content focused on CLI in support of the mission. A priority is to create the data to support establishing public health goals that will fulfill the mission. The growing membership of the Society will be enhanced by collaboration and support of the CLI components of educational meetings.

Consensus activities with partnering organizations now include society educational sessions and/or member discounts at:
- 1st National Interdisciplinary Congress on Critical Limb Ischemia Treatment
- American Professional Wound Care Association (APWCA) National Clinical Conference
- Amputation Prevention Symposium (AMP)
- Cardiovascular and Interventional Radiological Society of Europe (CIRSE)
- International Symposium on Endovascular Therapy (ISET)
- New Cardiovascular Horizons (NCVH)
- Symposium on Advanced Wound Care (SAWC) Spring and Fall
- Visionary Endovascular & Vascular Education (VERVE)

Countries with member representation

Founding Board Members:
- Alan T. Hirsch, MD
- Michael R. Jaff, DO
- Barry T. Katzen, MD
- Jihad A. Mustapha, MD
- Dierk Scheinert, MD
- Frank J. Veith, MD
The Society has developed committees tasked with working on issues that include development of a unified definition of CLI; supporting the public health urgency of this disease by addressing CLI population health issues; analyzing technical alternatives to CLI revascularization procedures by supporting uniform quality metrics; and developing resource based algorithms based on proven clinical practice and education for patients, referring physicians, treating physicians, and third party payers.

REFERENCES

We must address the unmet need of critical limb ischemia. In the United States lower extremity PAD manifests as CLI in nearly 1 million Medicare patients per year with an estimated annual cost of over 3 billion dollars. One in 190 Americans (1.6 million) are living with loss of a limb. Unchecked, this number may more than double by 2050 to 3.6 million.

Barry T. Katzen, MD
President, CLI Global Society
